

## DESIGN PLANNER

We encourage you to take a minute to fill out this Design Planner before visiting the StarMark Cabinetry showroom. It helps you sort and plan all the details that go into a cabinetry design. Fill out one planner per room—remember, cabinetry is a beautiful way to add function to any room!

## MY STYLE IS

Select the theme that best represents your personality or style.

#### TRADITIONAL

Details and texture help give a traditional kitchen interesting layers. StarMark Cabinetry has many doors and finishes that can star in a kitchen, or step back and let stone and granite take center stage.

#### TRANSITIONAL

Traditional favorites like wood cabinetry and tile floors blend well with sleek surfaces such as glass and steel. StarMark Cabinetry has many door styles and finishes that hold their own against expanses of contemporary materials. You can have warm and inviting, and a contemporary feel, wrapped into one living space.

#### CONTEMPORARY

The clean lines of a contemporary kitchen make a big impact. In a contemporary kitchen, it's the job of the cabinetry to provide a subtle backdrop for dramatic tile and art. StarMark Cabinetry offers several door styles and finishes that will work well for contemporary kitchens and other rooms. Try Aero, Monroe and Tempo wood doors and Bamboo, Rosewood and Wenge Exotic Veneers.

# DRAWING YOUR FLOOR PLAN

We want to design your project accurately from the beginning. You can help us by providing a floor plan. Using the grid page six, indicate your floor plan and record the following dimensions and the location of doors, windows and appliances.

## FLOOR PLAN INFORMATION

- Begin by roughly drawing the shape of your room on a plain sheet of paper or a copy of the grid on page 6. Add doors, windows, breaks in the wall and all obstructions. Indicate in which direction doors swing and where they lead. Note utility connections, ducts, outlets, lighting fixtures vents and radiators. Record all details in inches on your rough drawing. (see example below)
- Start in one corner of the room, select a wall, and measure the distance in inches, of every item on that wall from the corner. Write all measurements on your sketch. (see example below)

- Continue to measure all around the room until everything is located, measured and marked on your sketch.
- Indicate the overall length of walls, height of the walls and the distance of everything from the floor—like outlets, light switches, ledges and soffits. For new construction, remember to take into consideration sheetrock thickness.
- Check that you correctly measured your room by adding your measurements for each wall and comparing them to the opposite wall.
- Include dimensions of islands or peninsulas.

## TRANSFER YOUR INFORMATION

- Using the grid on page six, transfer the information from your sketch. Use the example below as a guide as to what dimensions are necessary to complete your design. Cross check your layout with your measured sketch.
